OBJECTIVES:

- To discuss ways radiology can help diagnose child abuse.
- To evaluate the impact of recruitment of foreign nurses in the United States health care system.
- To assess and discuss the intricacies of wound care in the primary care setting.
- To explain and discuss management of insect bites producing allergy symptoms.
- To discuss management and prevention of toxic inhalations or ingestions in the home that may warrant emergency room visit.
- Discuss management and treatment of the symptoms of congestive heart failure.
- Discuss behavioral and psychological symptoms of nursing home residents.
- To bring into focus epidemiological updates for primary care in the State of Minnesota.
- A reminder that the foot needs care as much as the heart.
- An update on the management and treatment of aging patients living with HIV.
- To review advances in electronic medical record systems within the medical field.
- To investigate new trends in the management and treatment of skin neoplasms.
- To share experiences in the 6th PMMA Medical Mission in Cadiz City, Negros Occidental, Philippines.
- To outline and discuss individual treatment of breast cancer.
- To introduce a new trend in Pain Management – Laser therapy.
- To explain how hard-hitting sports activities could cause permanent brain damage.
- To explore the many ramifications of health care reform especially for primary care.
- To demonstrate the dangers of drugs as it affects our society today.

32nd Annual PMMA Clinical Conference
