## Educational Objectives:

- Learn and witness reconstructive surgery procedures in commonly encountered cases in primary practice.
- Become aware of the new therapeutic regimen in the management of Alzheimer's disease.
- Understand primary care approach in children who fail to thrive.
- Discuss options of treatment of increasing neuropathic symptoms of Carpal Tunnel Syndrome.
- Emphasize new therapeutic guidelines for HIV.
- Practice evidence based approaches to patients with urticaria.
- Learn new therapeutic concepts in the management of Type II Diabetes Mellitus.
- Introduce and explain Health Care Program for majority of Americans.
- Review and Presentation of the 4<sup>th</sup> PMMA Medical Mission in Cebu City, Philippines, Jan 2008.
- Discuss new trends in Glucocorticoid Replacement Therapy for the fading sexual function in males.
- Learn more of the diagnostic modalities in Horner's Syndrome.
- Explore diagnosis and treatment of first unprovoked seizure.
- Explain the medical ramifications of jaundice in Term and Pre-Term Infants.
- Become aware of spine deformities in children, like scoliosis.
- Discuss and expand medical knowledge in the prevention of atherosclerosis.
- Informative exploration for the application of Hypnosis in patients with chronic pain syndrome, patients undergoing major surgery, and patients with psychiatric disorders.
- To learn the causes, evaluation, and treatment of acute and chronic renal failure.
- Exposure to the difficult yet intriguing spectrum of autism.
- To be able to understand and treat the very common yet difficult symptoms of snoring and sleep apnea.
