Objectives

- To understand the sexual deficits after spinal cord injury.
- To review topical vs. oral pain approaches.
- To familiarize severity of brain injury and predictors of recovery.
- To understand the complexity of the diagnoses that can fall under the umbrella of Chronic Pelvic Pain (CPP).
- To assess and evaluate common complaints of memory loss in an office setting.
- To better comprehend and understand common causes of sleep disorder and offer constructive reassurance and comfort.
- To understand the role of the Kidney and incretin hormones in the treatment of Type 2 DM.
- To identify basic functions of the VAD equipment including power sources and alarms.
- To review the screening guidelines and recommendations of vascular diseases.
- To familiarize the practitioner with the common foot deformities in childhood and adolescence.
- To review the impact of early goal-directed therapy in sepsis and septic shock.
- To evaluate the cause and develop strategy in the management of FUO – fever of unknown origin.
- To define the scope of palliative medicine and describe Hospice and its benefits.
- Define Advance Care Planning, health care agent, health care directive and POLST; and discuss the importance of recognizing and following advance care directive by practitioners.
- To understand the role of Hospitalist in the hospital care setting.
- To make you aware of the medical needs of people in third world countries with the PMMA Mission Experience

Moderators
